## INDIANS, CITY REACH AGREEMENT

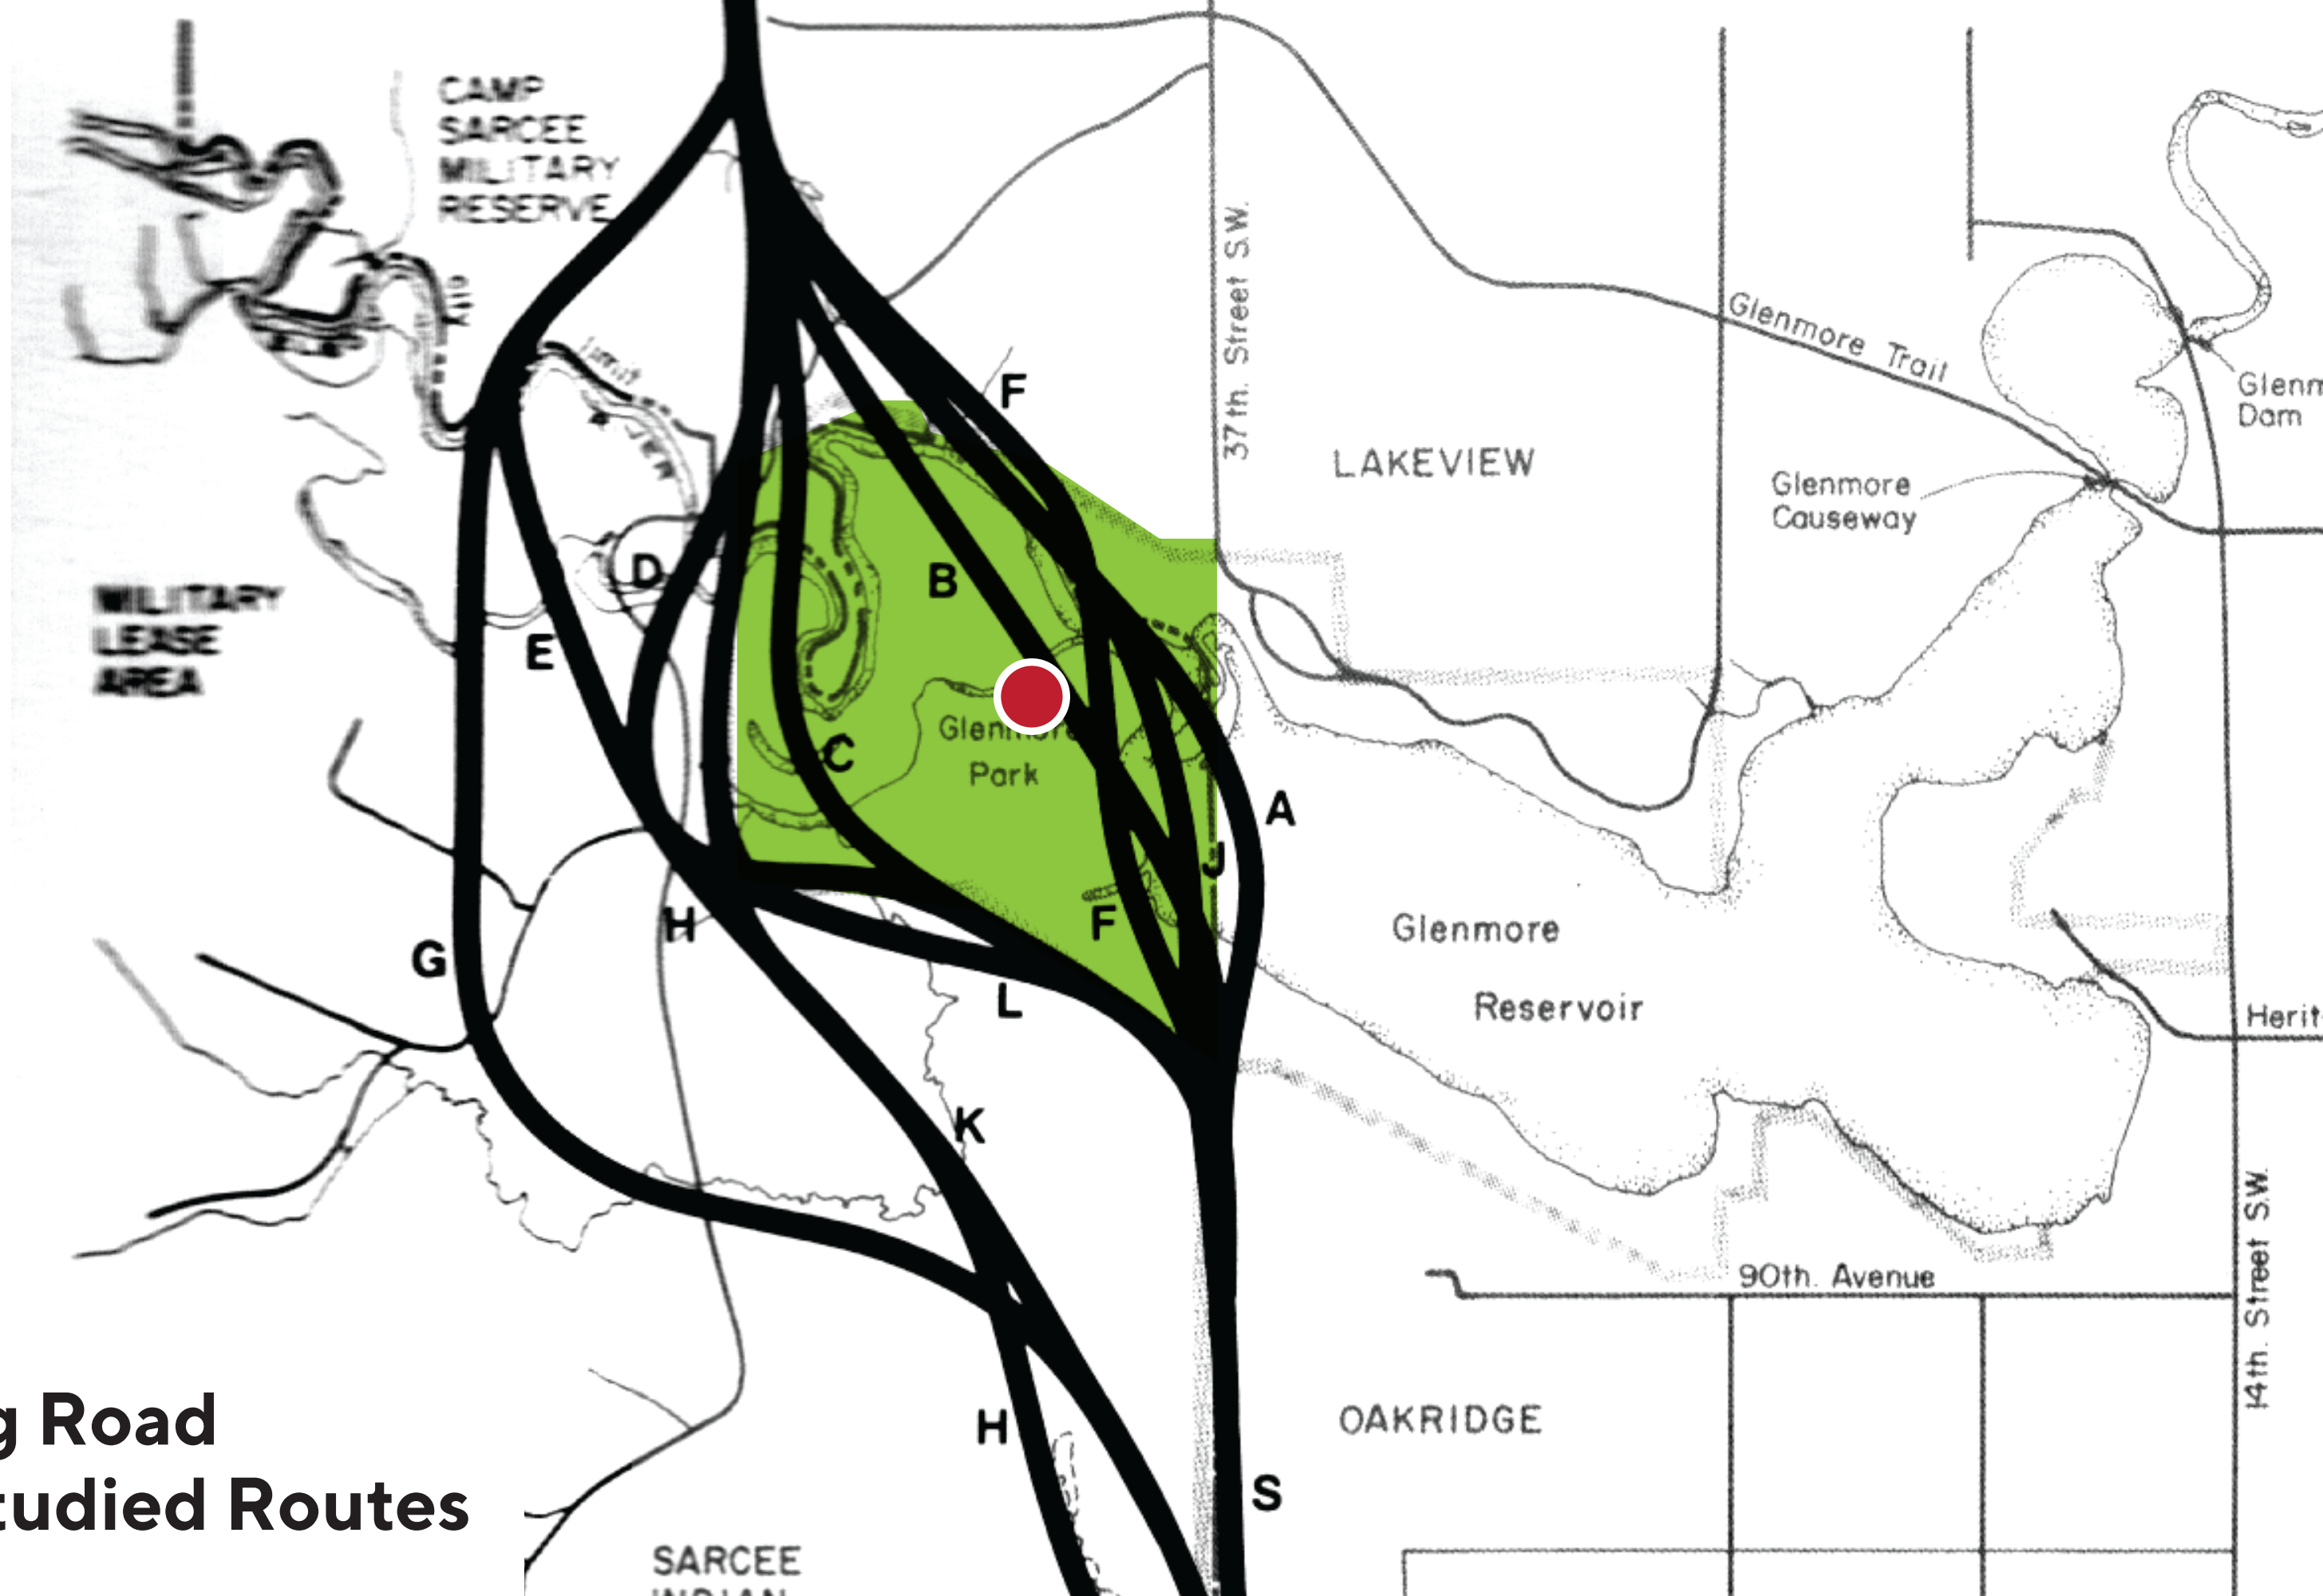

Chief Joe Big Plume of the Sarcee Indians sealing the deal by shaking hands with City Solicitor L. W. Brockington, K.C., after the councillors of the Sarcee Indian tribe voted unanimously to sell 593 acres of their reservation to the city as part of the new water dam project. In the background, reading from left to right, are: Alderman R. H. Weir, H. S. Jones, valuator; Commissioner A. G. Graves, E. B. Nowers, valuator, and W. E. Robinson, city waterworks engineer.—Photo by W. J. Oliver, Herald Staff Photographer.

**CALGARY HERALD**  
CALGARY, ALBERTA, WEDNESDAY, DECEMBER 3, 1952

THE FIRST OF THE "PUSHBUTTON" TANKS, the Centurion, Mark III, is shown above as two of the models now on issue to Lord Strathcona's Horse (R.C.), traveled through some rough terrain at Sarcee military camp Tuesday afternoon. The Strathcona's are now in the process of converting from the use of the obsolescent U.S. Sherman to the new Centurion. A gunnery school in the use of the new 20-pounder gun, which will fire while the tank is on the move, is being conducted at Currie Barracks while a driving and maintenance course operates at Sarcee.

FIVE OF 10 BAZOOKA TEAMS engaged in firing practice at Sarcee military camp are shown above as they crouched in their weapon pits waiting the order to fire. The 2.36-inch rocket launcher shown here was used with great effect during the Second Great War. Although considerably smaller than the 3.5-inch to be used by the special force troops later, the principle for training purposes is the same. Gas masks are worn by the troops during practice purely as a precautionary measure.

**NUCLEAR EXPLOSION.** This picture shows a simulated atomic bomb seconds after it was exploded during an army exercise Sunday at Sarcee reserve. Although the bomb dispersed more rapidly than an actual atom weapon would have, it still looked authentic in its early stages. Forces defending Calgary during the exercise found it necessary to explode a nuclear bomb in order to keep the "enemy" from capturing Calgary.

THE CALGARY HERALD — Monday, May 19, 1952

MUSTANG AIRCRAFT FROM NO. 403 CITY OF CALGARY RESERVE SQUADRON, R.C.A.F., are shown above as they passed low over gun positions of the 41st Anti-Tank Regiment, (SP) R.C.A., at Sarcee military camp Sunday. The display took place as part of joint manoeuvres conducted by the two units over the weekend. Purpose of the scheme was to plaster pinpoint "enemy" positions with artillery and aircraft machine gun fire.
